

April 25, 1975

tion systems that may be subsidized by a city. The occasion for not asking to go to a bus type service related principally to the fact that they are serving the elderly, that the trip to the corner, to the bus-stop type arrangement particularly in the winter was very hazardous for these people. They felt that . . . the city itself felt that they would indicate their good faith as far as a limitation on the amount of subsidy by saying . . . by asking that they be allowed to use one mill. As Senator Fowler said, that might handicap other cities so inclined. It was withdrawn. They do not intend to levy additional funds. They're available under their mill levy, but they were encouraging this Legislature to permit them to do this by indicating good faith in that manner. Now the Public Service Commission appeared before the committee and asked that second class cities be included because this is a problem that is apparently quite common. They said they have had numerous requests for the same thing. Accordingly, the committee did include cities of the second class as well. I have no further comment on it. I think it is an attempt by a city to maintain some kind of transportation for its citizens. With that I would answer any questions anyone might have in this regard.

PRESIDENT: Any further discussion? The question is the advancement of 395. Record your vote. Have you voted? Record.

CLERK: 27 ayes, 0 nays.

PRESIDENT: The bill is advanced. Senator Mahoney.

SENATOR MAHONEY: Mr. President, I made an error when I gave you that as the last one. There's one more on this list here, 446. I don't think it will take too long.

PRESIDENT: Alright, we'll see how it goes.

CLERK: Read title. There are lengthy committee amendments, Mr. Pres . . . no there are just ordinary lengthy amendments. There are three pages of committee amendments. It's by Senator Fowler, Chairman of the Urban Affairs Committee.

PRESIDENT: Senator Fowler.

SENATOR FOWLER: Mr. President, members of the Legislature, these amendments were proposed by Ray Johnson the State Auditor. This was the only bill that he could attach these amendments to because this is the only section of the statutes that was opened up by the bill. What it does is to try and remove some complications that his office has had in auditing the books in the villages in the state. The State Auditor presented these amendments in a discussion before the committee. We thought they were very reasonable. I move their addition. I'd move for their adoption.

PRESIDENT: Question is the adoption of the committee amendments to LB 446. Any further discussion? Record your vote. Record.
